

PYE Products..... easy to use

PYECORNICE COMPOUND

For Fixing and Bonding Cornice

DESCRIPTION

PYECORNICE COMPOUND is a gypsum-based adhesive applied to plasterboard walls and ceiling for fixing and bonding cornice. It can also be used for touching-up fibrous plaster boards to produce a seamless and precise finish by using a steel trowel.

SUITABLE FOR

Fixing and bonding cornice to wall and ceiling plaster boards.

DIRECTIONS FOR USE

Mixing

- Use a container to fill with clean water.
- For required consistency of the mixture, simply sprinkle cornice compound into the later. The ratio is 2 or 3 parts of compound to 1 part water.
- Before mixing, soak the compound for 1 to 3 minutes.
- Over mixing is not encouraged as setting time of mixture could be sped up.

Application

- On the surface length of both edges of cornice, apply the mixture.
- To achieve a better result, simply press cornice into position until it holds.
- A broad knife is used to remove excess of compound.
- Use a damp sponge to clean off any residue.
- For bigger sized cornice it may need temporary support, for example, by using screws.

Product Code : FICO

- Cleanse tools with clean water after used and keep it dry.

TECHNICAL & PHYSICAL DATA

Colour	Off white
Form	Powder
Setting time	Approx. 30 minutes depending on the surrounding environment.
Adhesion	Very good bonding of cornice to plasterboard walls and ceilings.
