

PYE Products..... easy to use

## PYE STOPPING COMPOUND 30

*For Flushing Joints of Plaster Boards*

Product Code : PLST

### DESCRIPTION

**PYE STOPPING COMPOUND** is a plaster-based compound used for flushing joints of plaster boards. It can also be used as a putty to touch-up the fibrous plaster board and can produce a smooth fine finish using a steel trowel.

### DIRECTIONS FOR USE

#### *Surface preparation*

Inspect all nails and drive protruding nails below surface leaving 1/32 inch depression in surface. Make sure surfaces are clean, dry and free from foreign materials.

- Apply the mixture, filling up the joints using a steel trowel.
- Apply evenly over the joints and remove excess compound.
- Apply to fill up uneven surfaces.
- All tools to be washed with clean water and wipe dry before storing.

### *Application*

#### *Mixing*

- Fill container with clean water.
- Sprinkle the stopping compound into the water (Approx. 2 or 3 parts of compound to 1 part of water depending on the consistency required).

- Allow to soak for 1 to 3 minutes before mixing.
- Mix to a smooth creamy workable consistency.
- Do not over mix otherwise it will accelerate the setting time of the mixture.

### TECHNICAL & PHYSICAL DATA

Colour	White
Form	Powder
Drying time	Allow 25 minutes depending on the thickness.
Cleaning	Clean tools with water.

### STORAGE

- Store at place temperature in a cool and dry location.
- Keep away from direct exposure to sunlight.

### PACKING

20kg
