PYERUST-CONVERTER

Synthetic Resin Rust Stabiliser

DESCRIPTION

PYERUST-CONVERTER is a non-toxic rust converter based on a synthetic resin. It dries on new or rusted surfaces and chemically converts these surfaces to a black non-tacky layer in 30 minutes under normal conditions, forming an iron/iron oxide organic complex which gives complete protection for the treated surface.

SUITABLE FOR

Unpainted or rusted steel or metal surfaces prior to painting or recoating. It has good adhesion to steel, iron, galvanized steel and aluminums. Application areas include iron railings, factory steel structures, steel water tanks, gates, grilles, refrigerators, washing machines, cars, lorries, bicycles, motorcycles etc.

DIRECTIONS FOR USE

Surface preparation

All surfaces to be treated will have to be degreased and wire-brushed to remove loose particles and dust. Surfaces must be clean, dry and sound. Being water-based, **PYERUST-CONVERTER** is tolerant to damp surfaces.

Application

PYERUST-CONVERTER is supplied ready-to-use and requires no mixing. Stir well before applying.

Product code: PRRU

New Metal Surfaces: Use as a protective undercoat prior to painting over with gloss paint or other coatings.

Rusted Surface: Use two coats, depending on rust density. It can be left in its black finish or painted over.

TECHNICAL & PHYSICAL DATA

Colour	Off White
Form	Liquid
Odour	Odourless
Drying time	Touch dry: 15 - 20mins Overcoating: after 2 - 5hrs.
Coverage	1 litre covers approx. 10sq.ft.
Safety	Non-flammable and can be used in all environments.
Cleaning	Clean tools and equipment with water when wet.

PACKING

100ml, 1 litre, 4 litres & 20 litres
