

PYE Products..... easy to use

PYE WALCOAT 201

Finish Coat for Plastered Mortar Surface

DESCRIPTION

PYE WALCOAT 201 is a polymer modified cement based finish coat plaster specially designed for the application onto freshly plastered cement mortar. Formulated with selected polymers, it coats and encapsulates the cement particles in the wet mortar to form a continuous polymer matrix. This matrix will form a more monolithic finished surface and also act as a barrier to maintain high levels of moisture for improving hydration of mortar. It reduces shrinkage cracks and gives a high quality plaster surface suitable for either painting, wallpapering or simply as a finish surface. Ceramic tiles or natural stones can be fixed on **PYE WALCOAT 201** finished surface. **PYE WALCOAT 201** is not recommended to be applied on cured mortar.

SUITABLE FOR

Cement rendered surfaces.

DIRECTIONS FOR USE

Surface preparation

The base cement mortar should be semi-cured (touch dry). Pre-wetting is recommended if the base has achieved more than 80% of curing. However, over wetting resulting in accumulation of water on the surface should be avoided.

Mixing

Add about 7 litres of water to 25kg of **PYE WALCOAT 201** and mix with a power drill whisk or a suitable mechanical stirrer to homogenous smooth paste. Allow standing 10 minutes for additives to dissolve. Mix again before use.

Application

Apply by using a spray plaster machine or directly with a steel trowel or spatula. Level out to obtain a smooth finish.

Product Code : PLWC

TECHNICAL & PHYSICAL DATA

Colour	Grey
Recommended thickness	1-3mm
Form	Powder
Binder	Cement
Coverage	1.25kg/ mm/ m ²
Pot life	2 - 3 hours
Yield	Approx. 7 litres of water per 25kg bag.
Cleaning	Clean tools with clean water.
Fire hazard	Does not spread/ support fire.

STORAGE

PYE WALCOAT 201 has a shelf life of 6 months, if kept in a dry and cool condition.

PACKING

25kg or 40kg bags
